

PROGRESS IN DEVELOPMENT OF WebGIS PLATFORM

Odra Lagoon (DE-PL)

COASTAL PROTECTION by GIS Coastal Information System <http://gis.eucc-d.de/ikzm>

AVAILABLE INFORMATION THAT CAN BE PLACED ON THE PLATFORM WEBGIS:

A) Ecology

- types of fish (graph)
- the average suspension content

G) Protected areas

- biological reserves
- protected areas (national parks, landscape parks)
- protected areas internationally (Natura 2000)
- area of the proposed protection
- habitats of birds

AVAILABLE INFORMATION THAT CAN BE PLACED ON THE PLATFORM WEBGIS:

H) Water

- areas of obtaining excavated material from the bottom
- sedimentation enriched of Zn/Pb/P
- type of sediments
- class of water purity

F) Relief (coast type)

- low
- high

AVAILABLE INFORMATION THAT CAN BE PLACED ON THE PLATFORM WEBGIS:

C) Infrastructure

- roads
- buildings
- ports at Lagoon coast

D) Coastal protection

- coast protection structures

E) Administration

- boundaries of Polish districts (counties, municipal regions)

B) Tourism

- tourism facilities (camping, swimming, golf)
- areas for surfers
- hiking trails

WAYS OF ENTERING WEBGIS DATA:

DATA CAN BE SHOWN/ENTERED AS A:

- points
- lines
- polygons

ENVIRONMENTAL DATA ENTERED TO WEBGIS PLATFORM WILL PRESENTS TIME SCALE: FROM 1997 TO 2012

SOME WEBGIS DATA FROM GERMANY HAVE NO POLISH EQUIVALENT (E.G. LAGOON COSTLINE LENGTH SIGNS)
